SPECIALISED CONSTRUCTION

Indawo's specialised construction services carries a workmanship guarantee for refurbishment, restoration, specialised construction and shopfitting and tenant installations and alterations.

SPALLING

Concrete and steel are primary building materials used for their strength and versatility, but requires steel reinforcing. This steel is susceptible to deterioration, largely due to moisture ingress. It is vital that this deterioration is addressed to avoid larger repair costs based on structural damage over time.

ROOFING

Roof restoration is a cost effective means of upgrading buildings that can improve overall appearance and value and also reduce significant costs as a result of deterioration. Asbestos roof replacement must be done by registered asbestos contractors according to law.

WATERPROOFING

Indawo's team of professional waterproofers provides a targeted solution tailored to the needs of each waterproofing challenge.

STRUCTURAL REPAIRS

Over time and due to attacks on the integrity of a structure, concrete may deteriorate. Causes of concrete deterioration range from accidents to water ingress making it vital for regular checks as part of a maintenance plan.

ASBESTOS HANDLING

Asbestos handling is governed strictly by legislation. Only approved asbestos contractors are permitted to remove this dangerous substance. Indawo is a certified asbestos contractor registered at the Department of Labour.

FLOORING

From industrial and retail to commercial flooring systems, Indawo offers a range of tailored solutions, including classic flooring options through to state-of-the-art industrial solutions.
